Scientists and engineers at Oak Ridge National Laboratory use facilities like the Radiochemical Engineering Development Center, where new elements are discovered, isotopes are produced for lifesaving treatments, and new materials are investigated for nuclear reactors. It’s the kind of research that can be done only at ORNL, thanks to a diverse set of experts and world-class capabilities.

Find your opportunity to be a part of ORNL’s growing team at jobs.ornl.gov. We are looking for experts in:

- Enrichment Technology
- Fusion Energy
- Isotopes
- Modeling and Simulation
- Nuclear Energy and Fuel Cycle Technology
- Nuclear Security

For additional information, contact nuclearrecruiting@ornl.gov

“Oak Ridge National Laboratory’s multidisciplinary expertise and capabilities are perfect for addressing the challenges in nuclear science and technology that I work on, whether that is developing new isotope applications or devising tomorrow’s nuclear energy systems.”

-Kristian Myhre
Radiochemist

ORNL is an equal-opportunity employer. All qualified candidates, including protected veterans and individuals with disabilities, are encouraged to apply. ORNL is an E-Verify employer.

Big Science. Big Opportunities.
