Big science. Big opportunities.

Oak Ridge National Laboratory is home to nuclear scientists and engineers developing a path to fusion energy, researching innovative next-generation reactor designs, and advancing radioisotope production.

Come be a part of the largest US Department of Energy science and energy laboratory. Learn more at jobs.ornl.gov and find current opportunities in:

- Fission and fusion technologies
- Modeling and simulation
- Isotope research, development, and production
- Nuclear security

ORNL has a wide range of careers available for nuclear scientists and engineers. The lab is currently looking to fill positions in:

- Radiochemical sciences
- Radiation detection and imaging
- Nuclear criticality safety
- Design engineer for fusion technology

For additional information, contact nuclearrecruiting@ornl.gov

“I do not have trouble getting up in the morning to go to work. That’s because ORNL is a fascinating place filled with amazing scientists and staff doing world-renowned research. It makes me proud to be a part of a scientific community impacting so many lives.”

Julie Ezold,
Nuclear Engineer
