Get FIT. Wherever you are.

Plant safety is your top priority, regardless of where you’re working. That’s why **Fuels Integrated Training (FIT)** is now available on demand. Stay up to date on the latest information, improve your skills, and keep your plant working at optimal performance — get FIT wherever you are.

The FIT program’s series of in-depth, technical training courses offer virtual instruction tailored to all major nuclear plant designs. Covering all disciplines relevant to fuel design and operation, FIT helps you maintain the certifications necessary for your engineering training requirements.

Since FIT is on demand, we’ll be there whenever and wherever you need us, providing the knowledge on operating your plant with Framatome’s fuel in the safest, most efficient manner. **Power on, wherever you are.**
