

Delivering nuclear fuel innovation

Staying one step ahead in fuel innovation and development is never an easy task. It takes dedication, commitment and investment to supply the future needs of the nuclear energy industry. Framatome is delivering the future today.

In a time when safety margins, operating efficiency and plant economics are critical for the nuclear energy industry, we have developed a comprehensive suite of products and technologies to support not only today's existing fleet but also advanced reactors.

- Next generation fuel designs
- Advanced codes and methods
- Enhanced accident tolerant fuel technologies
- Leading edge additive manufacturing

We are not stopping there. We continue to produce new and advanced technologies to improve operations and economics for all reactor types.

Power on. For the future of clean energy.
