For over 60 years, Framatome has provided innovative solutions to the nuclear industry worldwide. Framatome U.S. Government Solutions leverages that expertise to deliver the same level of quality and service to our nation’s federal nuclear facilities. That includes:

- Supplying remote NDE inspection tools (seen above), fuel, instrumentation and controls, maintenance, component replacement and engineering to reactors across the U.S.

- Providing nuclear laboratories with metrology, specialty welding, site studies and much more

- Developing and supporting advanced reactor technologies with more flexible, cost-saving, safety-enhancing designs

You expect results, our people deliver — now, and for years to come.

**Power on.**
**The next generation of generation.**
