

ADVANCED TEST REACTOR

PLUG INTO  
**NUCLEAR @**

IDAHO NATIONAL LABORATORY

As the nation's premier irradiation testing facility for new fuels, the Advanced Test Reactor at INL supports the carbon-free energy production of the current reactor fleet. The ATR Core Internals Changeout will ensure the ongoing qualification of fuels and materials, to maintain U.S. leadership in nuclear energy.

With a renewed ATR that maintains and expands INL's technical capabilities, we need experts in fields ranging from nuclear engineering to human factors to modeling and simulation. INL offers flexible schedules, relocation packages, competitive salaries and more, in the fastest-growing state in America.
