

PLUG INTO
NUCLEAR @

IDAHO NATIONAL LABORATORY

Nuclear spectroscopy is a vital part of deploying a new generation of nuclear power plants. INL's analytical experience is second to none in developing and qualifying the fuels and materials that bring us carbon-free electricity.

To help us support the commercialization of advanced reactors, we need experts in fields ranging from fuel fabrication to radiochemistry to engineering. INL offers flexible working arrangements, relocation packages, competitive salaries and more, in the fastest-growing state in the nation.
