Nuclear Power Training Solutions

Experience realistic conditions while planning for work evolutions and responses to emergency situations with SIM-Teq Rad/Nuke Training Simulators

With SIM-Teq, You Have Options:

- Portable, set up in seconds
- Program “live” gamma sources up to 99,000 R/hr
- Auto-respond to multiple sources with realistic $1/R^2$ and shielded source response
- Detect simulated $\alpha$, $\beta$, or $\alpha+\beta$ contamination sources
- Configure, monitor, and control remotely using PC or tablet
- OEM survey meter, contamination probe and dosimeter models
- Model specific features, functions, alarms, faults and accessories
- The preferred solution for mockup training at over 30 nuclear plants in the USA
