The ANS Utility Working Conference and Technology Expo is an annual meeting of the minds that consistently generates strong, practical recommendations designed to address the industry’s most pressing needs. The focus of this year’s conference is to analyze cost drivers common to all nuclear power plants and recommend programs and processes to improve their efficiency and effectiveness, and to provide innovative solutions that enable a significant reduction in operating expenses.

The UWC also features outstanding networking opportunities throughout the event, including the annual golf tournament and Vendor Technology Expo. Sponsorship and exhibit opportunities are available.

Register by July 17 for best rates
