Section XI Inspections**

Get more from your data with Exelon Clearsight. We leverage innovative technologies in drones, robotics, sensors, and software to deliver key insights that help improve your system reliability.

Our inspections are faster than traditional methods, and significantly reduce costs and industrial safety risk. After collecting data, it is processed by our machine learning software and analyzed by subject matter experts. We deliver actionable insights tied to raw inspection data via our customer portal.

Our system is designed to be a turnkey solution and integrates with your existing systems via API. Coupled with a predictive maintenance program, Exelon Clearsight will continue to deliver value for many years.

Exelon Clearsight™

Enhance industrial safety and reduce costs, while getting higher quality data and new insights.
