Perfect Solution for Leaking Heat Exchanger Tubes!

Trusted by Nuclear Power plants around the world as the industry's leading tube leak solution, Pop-A-Plug Tube Plugs are engineered for optimal performance throughout the life cycle of the heat exchanger, unlike friction fit or elastomer plugs. Controlled hydraulic installation also eliminates welding and time-consuming pre-/post-weld heat treatments that can cause damage to tubes, tube sheet ligaments, and joints. Pop-A-Plug Tube Plugs meet guidelines contained in EPRI, INPO, and ASME PCC-2. Perfect solution for 89-13 programs.

- Pressure rating 7000 PsiG (483 BarG)
- Helium leak tight seal to 1 x 10⁻¹⁰ cc/sec
- Wide range of sizes/materials to accommodate any application
- 100% lot tested to ensure unmatched quality

Weakened or severed tubes? Ask about our Pop-A-Plug® Tube Stabilizers
