

MILLIONS OF METERS DELIVERED ONE UNCOMPROMISING APPROACH

When it comes to quality standards, our customers in the nuclear industry are in a class of their own. Which is why, for more than 40 years, we've invested heavily in their success. Including the world's largest mill dedicated to advanced manufacturing of stainless steel and high nickel alloy tubing for nuclear steam generator and cladding tubing. The result? Uncompromising precision and performance. Exceptional safety and documentation. And one set of stringent controls – from melt to finished product. With more than 100 reactors units served and 60 million meters of nuclear fuel tubing supplied, the only question is: What can our fully integrated production do for you? Visit smt.sandvik.com to find out.
