**PHOENIX NUCLEAR LABS**

BUILDING THE WORLD'S STRONGEST COMMERCIAL NEUTRON GENERATORS

Phoenix Nuclear Labs delivers the world's most powerful commercial neutron generators – with systems delivered having neutron yields up to  $3 \times 10^{11}$  DD n/s. PNL's solution utilizes a microwave ion source and a deuterium, tritium, or mixed species target. Targets are available in either self-loading solid or gaseous form, providing significantly increased neutron yields and lifetimes of up to 10 years for both the target and the source.

Capabilities formerly available only with a nuclear reactor or a radioactive source are now possible in-house with a PNL neutron generator. At PNL, we're providing nuclear technology for the betterment of humanity.
