

# rotork®

Products for the Nuclear Power Industry 

Whether the nuclear application requires a pneumatic, hydraulic, electric or manually operated actuator, Rotork has solutions qualified to industry standards including IEEE 382/344/323 and RCCE.

Rotork has over 50 years experience supplying the nuclear power industry and maintains a strong Quality Assurance programme that is in line with industry requirements such as ANSI N45.2, 10CFR50 Appendix B, and ASME NQA-1. Our QA programmes are regularly audited by NUPIC & NIAC.

- *Electric actuators*
- *Linear actuators*
- *Gas-charged hydraulic actuators*
- *Rotary actuators*
- *Electro-hydraulic actuators*
- *Manual and motorised gear operators*

For information on Rotork flow control solutions for nuclear applications, contact the offices below or visit our website.
