

When it comes to safety I&C systems, you need intelligence on a nuclear level.

Compromising on safety in the nuclear industry just isn't an option. Which is why Rolls-Royce I&C solutions are at the forefront of safeguarding over half of the world's power plants.

Spinline and **Rodline** digital technologies are unique to Rolls-Royce. And when it comes to safety, intelligence and reliability, you won't find better systems, anywhere. This is why they're installed in over 100 reactors worldwide.

What's more, when it comes to industry experience and expertise, there is no other name that has a longer, safer or more successful track record than Rolls-Royce.

There are safety I&C systems. And there are intelligent nuclear safety I&C systems from Rolls-Royce.
