PureFlo

3000 PAPR WELDING
HARD HAT
DISPOSABLE HOOD

The PureFlo 3000 PAPR is customizable to your exact needs. With multiple configurations for radiological work, metal fabrication, welding and grinding, it provides protection against respiratory hazards including particulates, Manganese, Silica, and Hexavalent Chromium. Safety features such as no belts, hoses or other snag hazards allow for safe use of fall protection. This new lighter weight system also includes a LED low battery and air flow indicator, reduced parts and maintenance, easy decon, and improved donning and doffing, leading to lower cost for your entire program.
