The RPV package crosses the San Juan Creek Bridge in San Juan Capistrano, Calif., at night by rail. The 36-axle Schnabel car, the largest in the world, has a capacity to transport loads of up to 880 tons. “From start to finish, the project required detailed planning and coordination between the Southern California Edison SONGS oversight team and our contractors, and was done with safety as the top priority,” stated Doug Bauder, SCE vice president and chief nuclear officer.
