HISTORY

The Pacific Basin Nuclear Conference (PBNC) was initiated originally as regional cooperative fora to advance peaceful uses of nuclear energy in the Pacific Basin region. The first meeting was held in 1976 in Honolulu, Hawaii, USA. They have been held about every two years, under the joint sponsorship of the Pacific Nuclear Council (PNC) and a sponsoring PNC Member Society. The conferences have played a vital role in providing a forum for discussion and information relating to both research and development and to the implementation of nuclear energy technology in the Pacific Basin.
