

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 169, NUMBER 2, OCTOBER 2011

## CONTENTS

### TECHNICAL PAPERS

- 111 Multilevel Quasidiffusion Methods for Solving Multigroup Neutron Transport  $k$ -Eigenvalue Problems in One-Dimensional Slab Geometry *Dmitriy Y. Anistratov, Vladimir Ya. Gol'din*
- 133 On the Construction of Galerkin Angular Quadratures *Richard Sanchez, Jean Ragusa*
- 155 Rational Approximations to the Matrix Exponential in Burnup Calculations *Maria Pusa*
- 168 Monte Carlo Application of Arnoldi's Method for Acceleration of Eigenvalue and Fission Source Convergence *Jeremy Lloyd Conlin, James Paul Holloway*
- 178 Gas Production in the MEGAPIE Spallation Target *Nicolas Thiollière, Luca Zanini, Jean-Christophe David, Jost Eikenberg, Arnaud Guertin, Alexander Yu. Konobeyev, Sébastien Lemaire, Stefano Panebianco*
- 188 Measurements of  $(n, 2n)$  Reaction Cross Sections at 14 MeV for Several Nuclei *Chuanxin Zhu, Yuan Chen, Yunfeng Mou, Pu Zheng, Tie He, Xinhua Wang, Li An, Haiping Guo*
- 198 Calculation of the Complete Sets of Nuclear Data for  $n + {}^{32,34}\text{S}$  Below 20 MeV *Shenggui Yin, Xiaolong Huang*

### TECHNICAL NOTES

- 208 Application of the Differential Evolution Method to Solving Inverse Transport Problems *Keith C. Bledsoe, Jeffrey A. Favorite, Tunc Aldemir*
- 222 Aerosol Behavior During a Postulated Severe Accident in a 540-MW(electric) PHWR Containment *Sanjeev Kumar Sharma, Manoj Kansal, N. Mohan, P. K. Malhotra, S. G. Ghadge*
