

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 173, NUMBER 1, JANUARY 2013

## CONTENTS

### TECHNICAL PAPERS

- |    |                                                                                                                                                          |                                                                                  |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------|
| 1  | Development of a Solidification Model for TEXAS-VI Code and Application to FARO L14 Analysis                                                             | <i>R. H. Chen, M. L. Corradini,<br/>G. H. Su, S. Z. Qiu</i>                      |
| 15 | Meta-Analysis Options for Inconsistent Nuclear Measurements                                                                                              | <i>Tom Burr, Brian Williams,<br/>Stephen Croft, Morgan White,<br/>Ken Hanson</i> |
| 28 | Phase-Space Interpolated Perturbation Theory with Application to Advanced Test Reactor Shim Rotation Automation                                          | <i>Joshua Peterson,<br/>Erich Schneider</i>                                      |
| 43 | Determination and Application of Partial Biases in Criticality Safety Validation                                                                         | <i>Jeremy A. Roberts,<br/>Bradley T. Rearden,<br/>Paul P. H. Wilson</i>          |
| 58 | When Is the Simple Radiotoxicity Approach Useful for Advanced Fuel Cycle System Assessments Given the Existence of Complex Performance Dose Assessments? | <i>Steven J. Piet</i>                                                            |
| 82 | Fault Detection in Nuclear Systems Using Sliding Mode Observers                                                                                          | <i>Günyaz Ablay,<br/>Tunc Aldemir</i>                                            |

### LETTERS TO THE EDITOR

- |    |                                                                          |                        |
|----|--------------------------------------------------------------------------|------------------------|
| 99 | Comments on "Proliferation-Resistant Fuel for CANDU Reactors"            | <i>Jeremy Whitlock</i> |
| 99 | Reply to "Comments on 'Proliferation-Resistant Fuel for CANDU Reactors'" | <i>Yigal Ronen</i>     |
