

A NEW LIGHT WATER REACTOR SAFETY CONCEPT SPECIAL

303 Dedication / *Guenther Kessler, Wolfgang Breitung*

TECHNICAL PAPERS

305 Confinement of the Radiological Source Term During Beyond-Design-Basis Events in Future Pressurized Water Reactors / *Guenther Kessler, Bernhard Kuczera, Joachim Ehrhardt, Georg Henneges, Werner Scholtyssek, Hans-Werner Wiese*

319 Long-Term Containment Thermal-Hydraulic Loads in Pressurized Water Reactor Core-Melt Accidents / *Werner Scholtyssek*

331 Studies for the Staggered Pans Core Catcher / *Günter Fieg, Manfred Möschke, Heinrich Werle*

341 Transient Experiments with Thermitic Melts for a Core Catcher Concept Based on Water Addition from Below / *Walter Tromm, Hans Alsmeyer*

351 Dynamic Loads from Reactor Pressure Vessel Core Melt-Through Under High Primary System Pressure / *Günter Jacobs*

358 Severe Accident Containment Loads and Possible Design Concepts of Future Large Pressurized Water Reactors / *Guenther Kessler, Josef Eibl*

369 Slug Impact Loading on the Vessel Head During a Postulated In-Vessel Steam Explosion in Pressurized Water Reactors—Assessments and Discussion of the Investigation Strategy / *R. Krieg, T. Malmberg, G. Messemer, T. Stach, E. Stratmanns*

386 Passive Containment Cooling by Natural Air Convection / *Franz-Josef Erbacher, Hans-Joachim Neitzel*

395 Containment Pressure Loads from Hydrogen Combustion in Unmitigated Severe Accidents / *W. Breitung, R. Redlinger*

420 A Model for Structural Response to Hydrogen Combustion Loads in Severe Accidents / *W. Breitung, R. Redlinger*

426 Feasibility Study for a Containment to Resist Core-Melt Accidents / *Josef Butsch, Franz-Hermann Schlüter, Josef Eibl*
