

FOREWORD

LOW-TEMPERATURE NUCLEAR HEAT

The April and mid-April issues of *Nuclear Technology* are devoted to those papers from the Low-Temperature Nuclear Heat Meeting held at Helsinki University of Technology in Otaniemi, Finland on August 21-24, 1977, that were submitted to the Journal for publication. Unfortunately, not all authors presenting papers at the meeting chose to provide the additional information necessary for publication of their contributions; however, their presence and participation at the technical sessions helped make the meeting a technical success.

We want to take this opportunity to thank Risto Tarjanne for his efforts in coordinating the papers and acting as an intermediary between authors and our European Editorial Office during the early stages of the conference. In addition, we want to thank Peter Margen for his summary paper, to be found at the end of the mid-April issue. *Morton E. Wacks*
