

## Corrigendum

J. M. DOSTER and B. E. HEY, "Monte Carlo Simulation of the Gamma Dose Rate in a Loss-of-Water Accident at the North Carolina State University Research Reactor," *Nucl. Sci. Eng.*, **93**, 1 (1986).

The computed dose rates in the captions to Figs. 7 and 10 should read "rem/h." Also, the Summary, p. 10, should read "computed dose rates for the PULSTAR 10 min following a full-power shutdown range from 230 rem/h. . . ."
