

nuclear technology/fusion®

CONTENTS / APRIL 1981—VOL. 1, NO. 2

OVERVIEW

- 169 Materials Technology for Fusion: Current Status and Future Requirements / *R. E. Gold, E. E. Bloom, F. W. Clinard, Jr., D. L. Smith, R. D. Stevenson, W. G. Wolfer*

TECHNICAL PAPERS

FUSION

- 238 Energy Analysis of Coal, Fission, and Fusion Power Plants / *Nicholas Tsoulfanidis*
- 255 A Study of the Tritium Handling Systems in Magnetic and Inertial Confinement Fusion Reactors With and Without Tritium Breeding / *M. S. Ortman, E. M. Larsen, S. I. Abdel-Khalik*
- 275 Cryotrapping Vacuum Pumping System Design for a Helium Neutral Beam Injector / *M. A. Hoffman, A. S. Blum*
- 285 Stability of the Lithium "Waterfall" First Wall Protection Concept for Inertial Confinement Fusion Reactors / *P. D. Esser, D. D. Paul, S. I. Abdel-Khalik*

DEPARTMENT

- 165 Authors

ON THIS COVER

This figure, based on a report by R. E. Nygren, is taken from the overview article by R. E. Gold et al. It shows one sector of the Engineering Test Facility first-wall reference concept.
