## CONTENTS

### TECHNICAL PAPERS

- |     |  |  |
|-----|--|--|
| 189 | A Model for Neutron Scattering Off Heavy Isotopes That Accounts for Thermal Agitation Effects                              | <i>Mohamed Ouisloumen,<br/>Richard Sanchez</i>   |
| 201 | An Integral $S_n$ Method for Large-Memory Supercomputers   | <i>S. P. Monahan,<br/>W. L. Filippone</i>  |
| 217 | Synthetic Acceleration Methods for Linear Transport Problems with Highly Anisotropic Scattering                            | <i>Kassem M. Khattab,<br/>Edward W. Larsen</i>   |
| 228 | The Integral Line-Beam Method for Gamma Skyshine Analysis  | <i>J. Kenneth Shultis,<br/>R. E. Faw, M. S. Bassett</i>  |
| 246 | Space-Dependent Core/Reflector Boundary Conditions Generated by the Boundary Element Method for Pressurized Water Reactors | <i>Masafumi Itagaki,<br/>Carlos A. Brebbia</i>   |
| 265 | Benchmark Calculations for the Doppler Coefficient of Reactivity   | <i>Russell D. Mosteller,<br/>Laurence D. Eisenhart,<br/>Robert C. Little,<br/>Walter J. Eich, Jason Chao</i> |
| 272 | The Weighting Function of a Neutron Capture Detection System   | <i>F. Corvi, G. Fioni,<br/>F. Gasperini, P. B. Smith</i>   |
| 284 | Dynamic Character of Failure State in Damage Accumulation Processes  | <i>Dov Ingman, Leib Reznik</i>   |
