

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 108, NUMBER 4, AUGUST 1991

CONTENTS

TECHNICAL PAPERS

- | | | |
|-----|--|---|
| 325 | The Effect of Random Material Density on Reactor Criticality | <i>G. C. Pomraning</i> |
| 331 | Noise Analysis Method for Monitoring the Moderator Temperature Coefficient of Pressurized Water Reactors: I. Theory | <i>J. R. Thomas, Jr.,
J. D. Herr, D. S. Wood</i> |
| 341 | Noise Analysis Method for Monitoring the Moderator Temperature Coefficient of Pressurized Water Reactors: II. Experimental | <i>J. D. Herr, J. R. Thomas, Jr.</i> |
| 347 | Feedback Theory for Linear Reactivity Transients in a Point Reactor | <i>Takeo Nishigori</i> |
| 355 | Generalized Contribution Response Theory | <i>M. L. Williams</i> |
| 384 | The Maximum Entropy Method for Reconstruction of the Pointwise Neutron Flux Distribution in Nodal Methods | <i>Woo Sik Jung, Nam Zin Cho</i> |
| 396 | A New Critical Heat Flux Correlation for Boiling Liquid Metals | <i>H. M. Kottowski,
C. Savatteri, W. Hufschmidt</i> |
| 414 | Effective Atomic Numbers for Total Gamma-Ray Interaction and Incoherent Scattering in Some Alloys at 662 keV | <i>Ashok Madiyal,
I. Vasudeva Rao,
N. Lingappa, K. Siddappa</i> |
| 419 | VOLUME 108 AUTHOR AND SUBJECT INDEXES | |
