

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 109, NUMBER 1, SEPTEMBER 1991

CONTENTS

TECHNICAL PAPERS

- 1 An R Matrix Analysis of the ^{235}U Neutron-Induced Cross Sections up to 500 eV *L. C. Leal, G. de Saussure, R. B. Perez*
- 18 Pairing Corrections and Spin Cutoff Factors in Exciton Level Densities for Two Kinds of Fermions *C. Y. Fu*
- 26 Modeling of Fission Product Release and Transport for Severe Fuel Damage Analyses *K. Y. Suh, R. J. Hammersley*
- 39 High-Temperature Hydrogen Combustion in Reactor Safety Applications *Douglas W. Stamps, Marshall Berman*
- 49 The P_N Theory as an Asymptotic Limit of Transport Theory in Planar Geometry—I: Analysis *Edward W. Larsen, G. C. Pomraning*

TECHNICAL NOTES

- 76 The P_N Theory as an Asymptotic Limit of Transport Theory in Planar Geometry—II: Numerical Results *Robert P. Rulko, Edward W. Larsen, G. C. Pomraning*
- 86 Effects of Changing the Random Number Stride in Monte Carlo Calculations *John S. Hendricks*
- 92 Analysis of Beta-Ray Data Important to Decay Heat Predictions *J. K. Dickens*
- 103 Application of Knowledge-Based Methods to In-Core Fuel Management *A. Galperin, Y. Kimhy*

LETTER TO THE EDITOR

- 111 Comment on the Physical Interpretation of the Flux *Lawrence Ruby*
