

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 112, NUMBER 1, SEPTEMBER 1992

## CONTENTS

### TECHNICAL PAPERS

- 1 An Extended First Collision Source Method for Electron Beam Source Problems  
*W. L. Filippone,  
Jim E. Morel,  
Wallace F. Walters*
- 16 HELIOS: Angularly Dependent Collision Probabilities  
*Eduardo A. Villarino,  
Rudi J. J. Stamm'ler,  
Aldo A. Ferri, Juan J. Casal*
- 32 Iterative Methods for Solving  $x$ - $y$  Geometry  $S_N$  Problems on Parallel Architecture Computers  
*Musa Yavuz,  
Edward W. Larsen*
- 43 A WIMS-Based Calculational Route for Pebble-Bed Fuel  
*M. Segev, M. Caner*
- 54 Calculations of EURACOS Iron Benchmark Experiment Using the HYBRID Method  
*Bor-Jing Chang,  
Yen-Wan H. Liu,  
Chin Chung Wun,  
Herbert Rief*
- 66 Evaluation of In-Core Temperature Measurements by the Principal Components Method  
*M. Makai, E. Temesvári*
- 78 Differential Neutron Production Cross Sections for 800-MeV Protons  
*W. B. Amian, R. C. Byrd,  
C. A. Goulding,  
M. M. Meier, G. L. Morgan,  
C. E. Moss, D. A. Clark*

### TECHNICAL NOTES

- 87 Capture Cross Sections and Gamma-Ray Spectra from the Interaction of 0.5- to 3.0-MeV Neutrons with Nuclei in the Mass Range  $A = 45$  to 238  
*J. Voignier, S. Joly,  
G. Grenier*
- 95 Absorption of a Collimated and Uniform Beam of Neutrons in Cylindrical Samples  
*Hagai Shaked*

### LETTERS TO THE EDITOR

- 100 Comment on "Comment on 'Time-Independent Neutronic Analysis of the Chernobyl Accident'"  
*E. A. Fischer*
- 100 Response to "Comment on 'Comment on 'Time-Independent Neutronic Analysis of the Chernobyl Accident'"  
*Frej Wasastjerna*
