CONTENTS / JULY 1975—VOL. 26, NO. 3

TECHNICAL PAPERS

REACTORS

- 247 Simplified Small-Break Blowdown Models / *L. W. Ward*

CHEMICAL PROCESSING

- 254 Rocky Flats Experience with Borosilicate Glass Rings for Criticality Control / *C. L. Schuske, J. D. McCarthy*
- 265 Nominally Reflected Pipe Intersections Containing Fissile Solution / *Deanne Dickinson*

FUELS

- 278 Swelling of Uranium Silicide Fuel During Postirradiation Heating / *R. B. Matthews, M. L. Swanson*

MATERIALS

- 287 The Relationship Between Rupture Life and Creep Properties of $2\frac{1}{4}$ Cr—1 Mo Steel / *R. L. Klueh*
- 297 Effect of Fast Reactor Fluence on Postirradiation Rupture of Type 316 Stainless Steel / *A. J. Lovell*

RADIOISOTOPES

- 307 A Plutonium-238-Fueled Cardiac Pacemaker / *Michel Alais, René Berger, Rene Boucher, Kenneth A. Gasper, Paul Laurens*
- 320 Monte Carlo Dosimetry Calculation for Boron Neutron-Capture Therapy in the Treatment of Brain Tumors / *Owen Leslie Deutsch, Brian Winston Murray*

ANALYSIS

- 340 Remote Sensing of Plutonium by the Low-Energy Scattered Flux / *A. E. Profio, G. C. Huth*

(Continued)

ON THIS COVER

This month's cover is taken from the paper by Deanne Dickinson of The Dow Chemical U.S.A. The illustration was rendered by Dan Menking, senior industrial illustrator at the Rocky Flats Technical Information Office.
