CONTENTS / MID-AUGUST 1978—VOL. 40, NO. 1

TECHNICAL PAPERS

CRITICAL REVIEW

- 5 Void Swelling in Metals and Alloys Under Irradiation: An Assessment of the Theory / *L. K. Mansur*

REACTORS

- 35 Calculation of the Scale Factor for Inference of Pressurized Water Reactor Core Barrel Motion from Neutron Noise Spectral Density / *J. C. Robinson, F. Shahrokhi, R. C. Kryter*
- 47 Quantification of Core Barrel Motion Using an Analytically Derived Scale Factor and Statistical Reactor Noise Descriptors / *J. C. Robinson, F. Shahrokhi, R. C. Kryter*
- 52 Potential Radiological Consequences of a Multiple Steam Generator Tube Rupture / *Roy R. Fray*

FUELS

- 62 Fuel and Fission Gas Response to Simulated Thermal Transients: Experimental Results and Correlation with Fission Gas Release and Swelling Model / *G. Bandyopadhyay*
- 79 Application of the Warm Water Injection Method to Improve the Efficiency of In-Core Wet Sipping for Leaker Detection / *Shunsuke Uchida, Motoaki Utamura, Hideo Yusa, Hideo Maki*

MATERIALS

- 89 Oxygen Getters for Fast Reactor Fuel Pins / *C. E. Johnson, D. C. Fee*
- 98 How Does One Predict and Measure Radiation Damage? / *F. A. Nichols*

(Continued)

ON THIS COVER

This month's cover is taken from the paper by S. Uchida et al., of Hitachi, Ltd., Japan.

TECHNICAL NOTE

REACTORS

- 106** Effects of Recent Modeling Developments in Prompt Burst Hypothetical Core Disruptive Accident Calculations / *J. J. Sienicki, P. B. Abramson*

DEPARTMENT

- 1** Authors
