

## CONTENTS / AUGUST 1989—VOL. 87, NO. 1

### TMI-2: MATERIALS BEHAVIOR

- 13 Dedication / *Roy G. Post*
- 15 Introduction / *Sidney Langer*
- 17 Preface / *Richard K. McCardell*
- 19 Summary—Three Mile Island Unit 2: Materials Behavior / *Dennis E. Owen*

### PLENARY PAPERS

- 21 After Three Mile Island Unit 2—A Decade of Change / *Edwin E. Kintner*
- 23 Three Mile Island—The Political Legacy / *Richard T. Kennedy*
- 27 Regulatory Impact of the Three Mile Island Unit 2 Accident / *John F. Ahearne*
- 34 A Scenario of the Three Mile Island Unit 2 Accident / *James M. Broughton, Pui Kuan, David A. Petti, E. L. Tolman*
- 54 Three Mile Island Unit 2: Plant Recovery / *F. R. Standerfer*

### TECHNICAL PAPERS

- 57 Materials Interactions and Temperatures in the Three Mile Island Unit 2 Core / *Charles S. Olsen, Steven M. Jensen, Eric R. Carlson, Beverly A. Cook*
- 95 Metallurgical Reactions Involving Ag-In-Cd Control Rod Assemblies / *Yung Y. Liu, Lawrence A. Neimark, W. D. Jackson*
- 104 Examination of Three Mile Island Unit 2 Core Materials at Commissariat à l'Énergie Atomique / *Jacques Duco, Maria Troabas*
- 120 Metallurgical Examination of Bore Samples from the Three Mile Island Unit 2 Reactor Core / *Paul David Bottomley, Michel Coquerelle*
- 137 Analysis of Crystalline Phases in Core Bore Materials from Three Mile Island Unit 2 / *Allan Brown, Garry J. McIntyre, Christian Gräslund*
- 146 Reactor Core Materials Interactions at Very High Temperatures / *Peter Hofmann, Siegfried J. L. Hagen, Gerhard Schanz, Alfred Skokan*

(Continued)

#### ON THIS COVER

This month's cover shows the core end-state configuration for Three Mile Island Unit 2.

# CONTENTS / AUGUST 1989–VOL. 87, NO. 1

(Continued)

- 187** Fuel Relocation Mechanisms Based on Microstructures of Debris / *Robert V. Strain, Lawrence A. Neimark, John E. Sanecki*
- 191** Three Mile Island Unit 2 B-Loop Steam Generator Tubesheet Loose Debris Examination and Analysis / *George O. Hayner, Todd L. Hardt*
- 196** Fission Product Release Pathways in Three Mile Island Unit 2 / *Sidney Langer, M. L. Russell, Douglas W. Akers*
- 205** Three Mile Island Unit 2 Fission Product Inventory Estimates / *Douglas W. Akers, E. L. Tolman, Pui Kuan, Daniel W. Golden, Masahide Nishio*
- 214** Core Materials Inventory and Behavior / *Douglas W. Akers, Richard K. McCardell*
- 224** Fission Product and Core Materials Distribution Outside the Three Mile Island Unit 2 Reactor Vessel / *Charles V. McIsaac, Richard S. Denning, Rajiv Kohli, Douglas W. Akers*
- 234** Consideration of Cesium and Iodine Chemistry and Transport Behavior During the Three Mile Island Unit 2 Accident / *August W. Cronenberg, Sidney Langer*
- 243** Analysis of Fission Product Release Behavior from the Three Mile Island Unit 2 Core / *David A. Petti, James P. Adams, James L. Anderson, Richard R. Hobbins*
- 264** Fission Product Partitioning in Core Materials / *Douglas W. Akers, Richard K. McCardell*
- 273** Thermal Interaction of Core Melt Debris with Three Mile Island Unit 2 Vessel Components / *August W. Cronenberg, E. L. Tolman*
- 283** Thermal Behavior of Molten Corium During the Three Mile Island Unit 2 Core Relocation Event / *James L. Anderson, James J. Sienicki*
- 294** Just How Much Water Is Required to Cool a Molten Core? / *Sidney Langer*
- 298** The Three Mile Island Analysis Exercise / *Daniel F. Giessing*
- 302** Modeling of the Three Mile Island Unit 2 Accident with MELPROG/TRAC and Calculation Results for Phases 1 and 2 / *Frank E. Motley, Richard P. Jenks*
- 310** MARCH Calculations Performed for the Three Mile Island Unit 2 Analysis Exercise / *Roger O. Wooton*
- 326** Summary of the Three Mile Island Unit 2 Analysis Exercise / *Daniel W. Golden, Kikuo Akagane, Maurizio Colagrossi, Patrick Dumaz, Tohru Haga, Kazuichiro Hashimoto, John N. Lillington, Risto Sairanen, Ariel Sharon, Roger O. Wooton, Theo Van Der Kaa*

# CONTENTS / AUGUST 1989—VOL. 87, NO. 1

(Continued)

The following Materials Behavior papers will appear in the December 1989 issue of this special volume on TMI-2:

Three Mile Island Unit 2 Degraded Core Heatup and Cooldown Analysis / *R. L. Moore, D. W. Golden, E. L. Tolman*

Comparison of Thermal and Mechanical Responses of the Three Mile Island Unit 2 Reactor Vessel / *G. L. Thinner, R. L. Moore*

Molten Material Behavior in the Three Mile Island Unit 2 Accident / *R. R. Hobbins, M. L. Russell, C. S. Olsen, R. K. McCardell*

MELCOR Analysis of the Three Mile Island Unit 2 Accident / *Edward A. Boucheron, John K. Kelly*

Thermal-Hydraulic Analysis of the Initial Phase of the Three Mile Island Unit 2 Accident / *K. Hashimoto, K. Soda, H. Sekiya*

Simulation of the First 174 Minutes of the Three Mile Island Unit 2 Accident Using MAAP 3.0B / *Ariel Sharon, Laurence J. Godin, Francisco J. de Mora, Robert E. Henry, Garry Thomas*

ATHLET Analysis of the Three Mile Island Unit 2 Accident / *Adly B. Wahba, Fritz Steinhoff*

Thermal Interactions During the Three Mile Island Unit 2 2-B Coolant Pump Transient / *Pui Kuan, J. L. Anderson, E. L. Tolman*
