

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 112, NUMBER 2, OCTOBER 1992

## CONTENTS

### TECHNICAL PAPERS

- |            |  |   |
|------------|--|---|
| <b>101</b> | Probabilistic Reactor Dynamics—III. A Framework for Time-Dependent Interaction Between Operator and Reactor During a Transient Involving Human Error | <i>J. Devooght, C. Smidts</i>   |
| <b>114</b> | Probabilistic Reactor Dynamics—IV. An Example of Man/Machine Interaction   | <i>C. Smidts</i>  |
| <b>127</b> | Using Fourier Series Methods to Reduce Correlation of Nuclear Power Reactor Data   | <i>Keith Humenik,<br/>Kenny C. Gross</i>                                |
| <b>136</b> | Correlation Analysis with Neutron Count Distribution for a Paralyzing Dead-Time Counter for the Assay of Spontaneous Fissioning Material             | <i>W. Hage, D. M. Cifarelli</i>   |
| <b>159</b> | Analytic Monte Carlo Score Distributions for Future Statistical Confidence Interval Studies  | <i>Thomas E. Booth</i>  |
| <b>170</b> | Generalized Drift Flux Correlation for Vertical Flow   | <i>Kenji Takeuchi,<br/>Michael Y. Young,<br/>Lawrence E. Hochreiter</i> |
| <b>181</b> | Radiation Response of Hydrated Urea Evaluated Using $^{14}\text{N}$ Nuclear Quadrupole Resonance   | <i>David E. Hintenlang,<br/>Garry A. Higgins</i>                        |
