

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 103, NUMBER 2, OCTOBER 1989

CONTENTS

- vii Editorial *Dan G. Cacuci*
- ix Foreword: The 1988 International Reactor Physics Conference *Harold F. McFarlane*

TECHNICAL PAPERS

- 109 A New Resonance Region Evaluation of Neutron Cross Sections for ^{235}U *G. de Saussure, L. C. Leal, R. B. Perez, N. M. Larson, M. S. Moore*
- 119 Evaluation of the Unresolved Resonance Range of ^{238}U *F. H. Fröhner*
- 129 Delayed Neutron Data and Group Parameters for 43 Fissioning Systems *M. C. Brady, T. R. England*
- 150 Analysis and Results of a Hydrogen-Moderated Isotope Production Assembly in the Fast Flux Test Facility *D. W. Wootan, J. A. Rawlins, L. L. Carter, H. R. Brager, R. E. Schenter*
- 157 Prediction Uncertainty Evaluation Methods of Core Performance Parameters in Large Liquid-Metal Fast Breeder Reactors *Toshikazu Takeda, Akira Yoshimura, Takanobu Kamei, Keisho Shirakata*
- 166 A Study of High-Burnup and Long-Operating-Cycle Core Concepts for Large Liquid-Metal Fast Breeder Reactors *Yoshio Watari*
- 182 Trends Versus Reactor Size of Passive Reactivity Shutdown and Control Performance *David C. Wade, Edward K. Fujita*
- 196 Critical Experiment Tests of Bowing and Expansion Reactivity Calculations for Liquid-Metal-Cooled Fast Reactors *R. W. Schaefer*

TECHNICAL NOTE

- 210 An Analysis of Gamma-Ray Energy Deposition in a Heterogeneous Liquid-Metal Fast Breeder Reactor *Masatoshi Kawashima, Tadashi Yoshida, Tsugio Yokoyama, Toshihisa Yamamoto*
