TECHNICAL PAPERS

REACTORS

- 5 Combined Free and Forced Convection Effects on Transient Temperature Distributions in a Scaled-Down Model of the Inlet Plenum of the SNR-300 Reactor / *J. F. L. M. Brukx, G. P. R. Hansen, P. Voj*
- 17 Experimental Verification of a Method for Simulating a Boiling Water Reactor Core Based on a Few-Group Coarse-Mesh Diffusion Scheme / *Sadao Uchikawa*
- 30 Plutonium Release from Burning Sodium / *J. L. Stakebake, H. N. Robinson*

FUELS

- 40 Experimental Investigation of Fuel-Coolant Interaction / *Wiktor Żyszkowski*
- 60 Analysis of the Venting System of the Gas-Cooled Fast Breeder Reactor Fuel Element for Various Operating Conditions / *Klaus W. Klein*

RADIOACTIVE WASTE

- 68 Preparation and Characterization of Sintered Glass-Ceramics from Calcined Simulated High-Level Waste / *E. G. Samsel, J. R. Berreth*

MATERIALS

- 76 Mechanical Properties of Liquid-Metal Fast Breeder Reactor Primary Piping Materials / *Charles R. Brinkman, Vinod K. Sikka, Roy T. King*
- 96 Modification of the Existing Yielding Creep Theory of Irradiation Creep in Zirconium and Zircaloy-2 / *P. K. Madden, R. V. Hesketh*

ACCELERATORS

- 103 Neutron Flux Measurement at the LAMPF Radiation Effects Facility / *Dennis G. Perry, Margaret L. Simmons, James S. Gilmore*

(Continued)

ON THIS COVER

This month's cover is a 7-kW LWR model, provided by Professor Glen Schoessow of the University of Florida. The picture shows the model core 70 s after the initiation of the emergency core cooling system.

TECHNICAL NOTES

CHEMICAL PROCESSING

- 110** Comment on the Interpretation and Application of Limiting Critical Concentrations of Fissile Nuclides in Water / *E. D. Clayton, B. M. Durst*

MATERIALS

- 112** The Effect of Chemistry Variations on the Short-Term Rupture Life and Tensile Properties of 20% Cold-Worked Type 316 Stainless Steel / *D. R. Duncan, M. M. Paxton*

DEPARTMENTS

- 1** Authors
