## COATED PARTICLE FUELS

This special issue on coated particles was initiated by Dr. Karl Wirtz, our Associate Editor for Europe. He enlisted the services of Dr. H. Nickel of Kernforschungsanlage Jülich and Dr. Terry Gulden of General Atomic Company. They provided yeoman service in collecting, reviewing, and editing the papers.

Thus, we are indebted to our European Editor and his office as well as to Dr. Nickel and Dr. Gulden, not only for the extraordinary effort they contributed, but for the excellence of the results of their efforts.

Without the professional skills and contributions of the authors, we could have no papers. We are especially appreciative of their contributions and proud of the final results. *The Editor.*
