

CORRIGENDUM

JOEL WEISMAN and ROY ECKART, "Basic Elements of Light Water Reactor Fuel Rod Design," *Nucl. Technol.*, **53**, 326 (June 1981).

In the definitions following Eq. (13) of the above cited paper, the value given for k_0 did not correspond to the stated units. The definition should have read

$$k_0 = 6.15 \times 10^{-3} \text{ W/m}\cdot^\circ\text{C} .$$
