

# TECHNICAL REVIEWERS

Again we would like to acknowledge the contributions of our many competent, dedicated reviewers. Their contributions are an essential step in scientific validation as well as invaluable to *Nuclear Technology*.

Since the reviewers' identification with the work they review must remain anonymous, we are recognizing their contributions publicly by listing them here in this, the final issue of *Nuclear Technology* for 1983. Many authors have expressed their appreciation for the reviewers' dedication and contributions. I am particularly grateful to each and every one of them.
