

STATUS OF METALLIC MATERIALS DEVELOPMENT FOR APPLICATION IN ADVANCED HIGH-TEMPERATURE GAS-COOLED REACTORS

E. FRICTION AND WEAR

- 491 Impurity Gas Effects on Friction and Wear of High-Temperature Materials for VHTRs / *Kenji Kikuchi, Hideo Kaburaki, Konomo Sanokawa, Katsuyuki Kawaguchi, Masaaki Nemoto, Shintaro Watanabe*
- 503 Development of Protective Coatings Against Primary Coolant Corrosion, Friction, and Wear / *W. Thiele, Günter Lehnert*
- 512 The Tribological Behavior of Tube Supports in Helium Heat Exchangers / *Marc-Olivier Borel, André Corthay, Heinz Fischli, Hans W. Fricker*
- 518 Development of a Chemical Vapor Deposition Silica Coating for U.K. Advanced Gas-Cooled Nuclear Reactor Fuel Pins / *Michael J. Bennett, Michael R. Houlton, Donald A. Moore, Alan I. Foster, Michael A. M. Swidzinski*
- 523 Physical Behavior of Thermal Barriers in High-Temperature Gas-Cooled Reactor Conditions / *J. J. Quillico, P. J. Despresles*

F. HYDROGEN AND TRITIUM PERMEATION

- 537 Terms and Results of Hydrogen Permeation Testing of Oxide-Scaled High-Temperature Alloys / *Josef Schaefer, Detlev Stöver, Rudolf Hecker*
- 550 Advances in the Development and Description of Tritium Permeation Barriers in High-Temperature Alloys / *Hans Peter Buchkremer, Rudolf Hecker, Heinz Jonas, Detlev Stöver, Uwe Zink*
- 562 Protective Layers on High-Temperature Alloys Against Hydrogen Permeation / *Hans Huschka, Guenther Luthardt, Volker E. Portscher*
- 570 Development of Protective Coatings to Reduce Hydrogen and Tritium Permeation / *August Mühlratzer, Hans Zeilinger, Hans Günter Esser*
- 578 Hydrogen Permeation in Metals During Exposure to a Process Gas Environment / *Naoki Kishimoto, Tatsuhiko Tanabe, Hiroshi Araki, Heitaro Yoshida, Ryoji Watanabe*

(Continued)

ON THIS COVER

This cover for the third and final issue on high-temperature gas-cooled reactor (HTGR) materials includes an overlay provided by Dr. Hubertus Nickel of an advanced HTGR with process heat applications used at Jülich.

CONTENTS / SEPTEMBER 1984—VOL. 66, NO. 3

(Continued)

G. IRRADIATION BEHAVIOR

- 597 Investigations into the Irradiation Behavior of High-Temperature Alloys for High-Temperature Gas-Cooled Reactor Applications / *Bernd A. Thiele, Hermann Diehl, Wilhelm Ohly, Heinz Weber*
- 607 Irradiation Effects on High-Temperature Gas-Cooled Reactor Structural Materials / *James R. Lindgren*
- 619 Temper and Neutron Irradiation Embrittlement in 2¼ Cr–1 Mo Steels for Pressure Vessels of High-Temperature Gas-Cooled Reactors / *Masahide Suzuki, Kiyoshi Fukaya, Tsuneo Kodaira, Tatsuo Oku*
- 630 Postirradiation Tensile and Creep Properties of Heat-Resistant Alloys / *Katsutoshi Watanabe, Tatsuo Kondo, Yutaka Ogawa*
- 639 Influence of Thermal Neutrons on the Brittleness of High-Temperature Gas-Cooled Reactor Liner Steel / *A. Alberman, G. Bley, P. Pépin, P. Soulat*

H. DESIGN CODES AND LIFE PREDICTION

- 649 Status of Structural Design Code for Metallic High-Temperature Gas-Cooled Reactor Components / *Hubertus Nickel, Florian Schubert*
- 661 High-Temperature Structural Engineering Data Needs / *Peter Thomas Hughes, Donald C. Allen*
- 667 Material Behavior Under Complex Loading / *Erik Bodmann, Hans-Jürgen Breuer, Gerhard Raule, Manfred Rödiger*
- 675 Lifetime Test of a Partial Model of a High-Temperature Gas-Cooled Reactor Helium-Helium Heat Exchanger / *Masaki Kitagawa, Hiroshi Hattori, Akira Ohtomo, Tetsuo Teramae, Junichi Hamanaka, Hiroshi Ukikusa*
- 685 Constitutive Equations for the Description of Creep and Creep Rupture Behavior of Metallic Materials at Temperatures Above 800°C / *Heinz-Josef Penkalla, Hans-Helmut Over, Florian Schubert*

I. NONDESTRUCTIVE TESTING

- 695 Methods for Nondestructive Testing of Austenitic High-Temperature Gas-Cooled Reactor Components / *Klaus Goebbels, Harald Kapitza*
