

TECHNICAL PAPERS

FISSION REACTORS

- 121 A Process Inherent Ultimate Safety Boiling Water Reactor / *Charles W. Forsberg*
- 135 Modeling of Boron Control During Power Transients in a Pressurized Water Reactor / *Philippe Mathieu, E. Distexhe*

NUCLEAR SAFETY

- 148 Modeling of Multiple-Component Aerosols—Sensitivities to Assumptions / *Hans Jordan, Philip M. Schumacher, Vladimir Kogan*

RADIOACTIVE WASTE MANAGEMENT

- 158 Source Term Characterization for the Maxey Flats Low-Level Radioactive Waste Disposal Site / *Ramesh Dayal, Richard F. Pietrzak, James H. Clinton*
- 178 A Melt Refining Method for Uranium-Contaminated Aluminum / *Tatsuhiko Uda, Hajime Iba, Kiyoshi Hanawa*
- 184 Oxidation-Induced Geochemical Changes in Trench Leachates from the Maxey Flats Low-Level Radioactive Waste Disposal Site / *Ramesh Dayal, Richard F. Pietrzak, James H. Clinton*
- 194 Stationary Transport of Dissolved Species in the Backfill Surrounding a Waste Canister in Fissured Rock: Some Simple Analytical Solutions / *Ivars Neretnieks*

RADIOISOTOPES AND ISOTOPES

- 201 Track-Etch Neutron Radiography with a New Boron Carbide Converter / *Genichi Matsumoto, Naohide Murata, Soju Suzuki, Mitsugu Matsumoto, Kohei Ohkubo, Yasushi Ikeda*

TECHNIQUES

- 212 Design of a New Counting Cell for Monitoring ^{85}Kr in Environmental Air Samples / *Jiunn-Guang Lo, Dar-Yeong Chen, Jen-Zen Wang*

(Continued)

ON THIS COVER

This month's cover was taken from a figure in the paper by C. W. Forsberg showing a two-phase natural circulation system for prestressed concrete reactor vessel cooling.

CONTENTS / FEBRUARY 1986—VOL. 72, NO. 2

TECHNICAL NOTE

FISSION REACTORS

- 218 Nonproliferation Issue of the Pebble Bed High-Temperature Reactor /
E. Teuchert, K. A. Haas

DEPARTMENT

- 117 Authors
