TECHNICAL PAPERS

FISSION REACTORS

- 5 Automatic Determination of Pressurized Water Reactor Core Loading Patterns That Maximize Beginning-of-Cycle Reactivity Within Power-Peaking and Burnup Constraints / *Gregory H. Hobson, Paul J. Turinsky*
- 14 Shielding Designs for Pressurized Water Reactors in France / *Gilles Champion, Josette Forestier, Thérèse Vergnaud*
- 27 A Study on Fuel Rod Vibration Induced by Baffle Jet Flow / *Kazuichiro Seki, Shigeru Kuwabara, Katsumi Tanimura, Shinsuke Matsumoto, Masao Toba*
- 38 Stability Tests at Browns Ferry Unit 1 Under Single-Loop Operating Conditions / *Jose March-Leuba, Richard T. Wood, Pedro J. Otaduy, Clayton O. McNew*

NUCLEAR SAFETY

- 53 Experience in the Use of Probabilistic Safety Analysis for the Development of Safety Concepts for Commercial High-Temperature Reactors / *Wolfgang Kröger, Johannes P. Wolters*

FUEL CYCLES

- 65 Computer Simulation of a Large-Scale Reprocessing Plant for Safeguards / *G. Spannagel, M. J. Canty, E. A. Kern*

NUCLEAR FUELS

- 76 Role of Surface Vaporization in Low-Volatility Fission Product Release Experiments / *A. B. Reynolds, J. L. Kelly, S. T. Kim*

MATERIALS

- 84 The Effect of Fast-Neutron Irradiation on the Fatigue-Crack Growth Behavior of Several Austenitic Stainless Steels and Weldments / *Lee A. James*

(Continued)

ON THIS COVER

This month's cover is taken from a figure in the paper by G. Champion et al., showing the access pit of a 900-MW (electric) power plant.

HEAT TRANSFER AND FLUID FLOW

- 93** Simulation of Heat and Mass Transfer in Molten Core/Concrete Interactions /
J. K. Paik, S. I. Abdel-Khalik

DEPARTMENTS

- 1** Authors
- 104** Book Reviews
