## CONTENTS / NOVEMBER 1989—VOL. 88, NO. 2

### NSF WORKSHOP ON THE RESEARCH NEEDS OF THE NEXT GENERATION NUCLEAR POWER TECHNOLOGY

- 103 Editor's Note / *James F. Schumar*
- 105 Foreword: NSF Workshop on the Research Needs of the Next Generation Nuclear Power Technology / *Robert E. Uhrig*

### TECHNICAL PAPERS

- 107 Executive Summary: Research in Nuclear Power—Workshop on the Needs of the Next Generation of Nuclear Power Technology / *A. David Rossin, KunMo Chung, K. L. Peddicord*
- 120 Nuclear Power Technology: A Mandate for Change / *KunMo Chung, George A. Hazelrigg*
- 129 The Integral Fast Reactor / *Yoon I. Chang*
- 139 Modularized High-Temperature Gas-Cooled Reactor Systems / *David D. Lanning*
- 157 Opportunities for Automation and Control of the Next Generation of Nuclear Power Plants / *Robert E. Uhrig*
- 166 A Look at Safety Goals and Safety Design Trends for Advanced Light Water Power Reactors / *David Okrent*
- 170 Materials Research Needs for Near-Term Nuclear Reactors / *John R. Weeks*

---

### FISSION REACTORS

- 175 The European Breeder Program / *G. Cicognani, A. M. Broomfield, R. Lallement, W. Marth*
- 183 Fast Breeder Reactors for Energy Security / *William M. Jacobi*

(Continued)

### ON THIS COVER

This month's cover, taken from Fig. 6 in the paper by W. M. Jacobi, shows details of a single-loop 340-MW (electric) unit.

# CONTENTS / NOVEMBER 1989–VOL. 88, NO. 2

## FUEL CYCLES

- 190** A Versatile Facility at Windscale, United Kingdom, for the Fabrication of Experimental Mixed Uranium-Plutonium-Oxide Nuclear Fuel / *Hugh M. MacLeod, George R. Chilton, J. Alan Dodd*

## ECONOMICS

- 201** A New Mixed Fossil/Nuclear Energy System for the Production of Electricity with Zero Emission of Carbon Dioxide / *W. Seifritz*

## DEPARTMENT

- 99** Authors
