

TECHNICAL PAPERS

FISSION REACTORS

- 123 Sensitivity Analysis of Thermal-Hydraulic Parameters and Probability Estimation of Boiling Transition in a Standard BWR/6 / *Smaeil M. Aceil, Doyle R. Edwards*
- 131 Sequential Probability Ratio Test for Nuclear Plant Component Surveillance / *Kenny C. Gross, Keith E. Humenik*
- 138 Core Simulations Using Actual Detector Readings for a Canada Deuterium Uranium Reactor / *Bong Ghi Kim, In Sup Kim, Seong Yun Kim*
- 147 Decontamination of Liquid-Metal Fast Breeder Reactor Components for Reuse: The French Experience / *Patrick Michaille, Jean-Claude Moroni, Irma Lambert*

NUCLEAR REACTOR SAFETY

- 158 The Potential for Catastrophic Fuel Damage During Beyond-Design-Basis Overpressurization Accidents in a Boiling Water Reactor / *David J. Diamond, Dragan Mirkovic, Chia-Jung Hsu, Robert Fitzpatrick*
- 166 Countercurrent Flow Limitation Model for RELAP5/MOD3 / *Richard A. Riemke*
- 174 Small-Scale Experiments Conducted to Support Investigation of Hypothetical Design-Basis LOCA Phenomena in the Advanced Test Reactor / *Thomas K. Larson, Keith G. Condie, Steven T. Polkinghorne, Brent J. Buescher*

NUCLEAR FUELS

- 195 A Statistical Model for Prediction of Fuel Element Failure Using the Markov Process and Entropy Minimax Principles / *Kie-Yong Choi, Young-Ku Yoon, Soon-Heung Chang*

NUCLEAR FUEL CYCLES

- 206 Development of Partitioning and Transmutation Technology for Long-Lived Nuclides / *Tadashi Inoue, Masahiro Sakata, Hajime Miyashiro, Tetsuo Matsumura, Akihiro Sasahara, Nobuya Yoshiki*

(Continued)

ON THIS COVER

This month's cover was taken from Fig. 4 of the paper by Gross and Humenik.

CONTENTS / FEBRUARY 1991 –VOL. 93, NO. 2

(Continued)

MATERIALS/NUCLEAR SAFETY

- 221 Severe Accident Zircaloy Oxidation/Hydrogen Generation Behavior Noted from In-Pile Test Data / *August W. Cronenberg*

HEAT TRANSFER AND FLUID FLOW

- 240 RELAP5 Simulation of Advanced Test Reactor Scaled LOCA Experiments 7, 8, 12, and 14 / *Steven T. Polkinghorne, Thomas K. Larson, Brent J. Buescher*

TECHNICAL NOTE

NUCLEAR REACTOR SAFETY

- 252 Development of a Computer Code to Simulate Aerosol Behavior in a Vented Containment / *A. K. Ahluwalia, A. M. C. Chan*

DEPARTMENT

- 260 Book Review
