SEVERE ACCIDENT TECHNOLOGY

253 Editor's Note / *William F. Vogelsang*

TECHNICAL PAPERS

- 255 Results of Recent Investigations at Sandia National Laboratories on Core Debris Interactions with Concrete / *Dana A. Powers, Ervin R. Copus, David R. Bradley*
- 262 Fission Product Transport Behavior / *T. S. Kress, E. C. Beahm, C. F. Weber, G. W. Parker*
- 270 Fission Product Release from Fuel Under Severe Accident Conditions / *Richard R. Hobbins, David A. Petti, Donald L. Hagrman*
- 282 Recent Advances in Severe Accident Technology—Direct Containment Heating in Advanced Light Water Reactors / *Mario H. Fontana*
- 299 The Probability of Liner Failure in a Mark-I Containment, Part I: Probabilistic Framework and Results / *Theo G. Theofanous, Hongfei Yan, Farouk Eltawila*
- 332 The Probability of Liner Failure in a Mark-I Containment, Part II: Melt Release and Spreading Phenomena / *Theo G. Theofanous, Hongfei Yan*
- 354 The Probability of Liner Failure in a Mark-I Containment, Part III: Corium/Concrete Interactions and Liner Attack Phenomena / *W. H. Amarasooriya, Hongfei Yan, Umesh Ratnam, Theo G. Theofanous*
- 385 Cooling of Core Debris Within the Reactor Vessel Lower Head / *Robert E. Henry, James P. Burelbach, Robert J. Hammersley, Christopher E. Henry, George T. Klopp*
- 400 Hydrogen Production and Combustion in Severe Reactor Accidents: An Integral Assessment Perspective / *Martin G. Plys*

DEPARTMENTS

- 411 Volume 101 Indexes
- v Volume 101 Contents

ON THIS COVER

This month's cover is based on Fig. B.5 of the paper by Theofanous and Yan, Part II of the series on liner failure in a Mark-I containment.
