SUBCHANNEL ANALYSIS

TECHNICAL PAPERS

- 299 Validation of the ASSERT Subchannel Code: Prediction of Critical Heat Flux in Standard and Nonstandard CANDU Bundle Geometries / *M. B. Carver, J. C. Kiteley, R. Q.-N. Zhou, S. V. Junop, D. S. Rowe*
- 315 Prediction of Dryout Performance for Boiling Water Reactor Fuel Assemblies Based on Subchannel Analysis with the RINGS Code / *P. Knabe, F. Wehle*
- 324 A Perspective on Large Eddy Simulation of Problems in the Nuclear Industry / *Yassin A. Hassan, John M. Pruitt, David A. Steininger*
- 331 The THYC Three-Dimensional Thermal-Hydraulic Code for Rod Bundles: Recent Developments and Validation Tests / *Sylvie Aubry, Christian Caremoli, Jean Olive, Paul Rasche*
- 346 The Application of Computational Fluid Dynamics to Critical Heat Flux / *James H. Stuhmiller, Paul J. Masiello, Govinda S. Srikantiah, Lance J. Agee*
- 355 A Utility Perspective on Subchannel Analysis / *Gregg B. Swindlehurst*
- 359 Equilibrium Quality and Mass Flux Distributions in an Adiabatic Three-Subchannel Test Section / *George Yadigaroglu, Athan Maganas*
- 373 Reactor Subchannel Analysis—Electric Power Research Institute Perspective / *G. Srikantiah*
- 382 The Japanese Utilities' Expectations for Subchannel Analysis / *Akio Toba, Akira Omoto*
- 388 Void Fraction Distribution in a Boiling Water Reactor Fuel Assembly and the Evaluation of Subchannel Analysis Codes / *Akira Inoue, Masanobu Futakuchi, Makoto Yagi, Toru Mitsutake, Shin-ichi Morooka*
- 401 Subchannel Thermal-Hydraulic Analysis at AP600 Low-Flow Steam-Line-Break Conditions / *T. Morita, C. A. Olson, Y. X. Sung, J. F. Connelley, Jr., E. H. Novendstern, S. Kapil, P. W. Rosenthal*
- 412 Pressurized Water Reactor Fuel Assembly Subchannel Void Fraction Measurement / *Yoshiei Akiyama, Keiichi Hori, Keiji Miyazaki, Kaichiro Mishima, Shigekazu Sugiyama*

DEPARTMENTS

- 422 Technical Reviewers
- 425 Volume 112 Indexes
- v Volume 112 Contents
