

CHARACTERIZATION OF RADIOACTIVE WASTE IN FRANCE

123 Introductory Note / *D. Alexandre, J.-C. Petit*

TECHNICAL PAPERS

- 125 The Specific Research and Development Contribution of Commissariat à l’Energie Atomique for the Disposal of Radioactive Waste Containing Long-Lived Elements / *Jean-Claude Petit*
- 135 Legislative and Regulatory Aspects of Radioactive Waste Management in France / *Jean-Christophe Niel*
- 138 The Role of Characterization as an Interface Between Safety Authorities, Waste Producers, Radwaste Managers, and Research Laboratories / *Denis Alexandre*
- 146 Characterization of Low- and Medium-Activity Radioactive Waste / *Alain P. M. Heres, Maxy C. Noe*
- 153 Neutron Moisture Meter Measurement in Waste Packages / *Josée Perfettini*
- 162 Nondestructive Determination of Activity / *Bernard Chabaliier*
- 173 Destructive Procedures and Analytical Tools for the Study of Radwaste Packages / *Dominique Grec*
- 178 Determination of Physical Homogeneity by Gamma-Ray Imaging / *Jean-Luc Pettier*
- 192 Studies on Important Radionuclides for the Safety of a Radioactive Waste Disposal Site: Correlation Between Easily Measurable Gamma Emitters and Long-Lived Radionuclides / *Alain Raymond, Brigitte Lagarde, Annick Pitiot*
- 198 Review of the Development of Waste Form Conditioning Processes in France / *C. Courtois, J. P. Moncouyoux, E. Revertegat*
- 208 Studies on the Degassing of Waste Packages / *Dominique Grec*
- 214 Overview of the French Program on Leaching Various Waste Forms / *J. C. Nomine, J. F. Ferriot*
- 228 Waste Forms—French Leaching Test Compared with Lysimeter Tests / *J. F. Ferriot, J. C. Nomine, V. Reynaud*
