

SUBJECT INDEX

Fusion Science and Technology

American Nuclear Society
Scientific Publications

Volume 66, Number 1
July/August 2014

CITATIONS ARE BY PAGE NUMBER

- A**
advanced reduced activation alloy, 200
- B**
benchmarking, 208
beryllides, 157
beryllium, 28, 118, 171
biological shielding, 245
blanket materials, 1
breeder materials, 136
breeding blanket, 28, 221
brittle destruction, 150
Broader Approach, 1
- C**
carbide-induced densification, 77
catalyst, 214
cementite, 283
ceramic pebbles, 136
compaction process, 187
computational assessment of material performance, 9
conductor joint, 187
creep, 131
critical current density, 157
- D**
defects and defect clusters, 235
DEMO, 18, 38, 100
 design, 1
 reactor, 9, 63
deposition rate, 70
design criteria, 18
design validation, 18
detritiation, 214
deuterium retention, 70, 171
diamond/Cu interlayer, 142, 260
discrete element analysis, 183
dislocation, 283
displacement cascade, 91, 112, 235
double-stacked structure, 221
- E**
EAST, 125
edge-localized modes, 100, 150
embrittlement, 106
erosion, 100, 118, 171
 products, 70
EU fusion materials program, 38
Eurofer, 131
- F**
fatigue, 131
FeCr alloy, 91
finite element method, 163
first wall, 63, 171, 180
fission reactor irradiation, 272
fusion materials, 252
- G**
grain boundary, 106
- H**
helium, 112
 cooled ceramic reflector (HCCR), 200
 cooled divertor, 266
 embrittlement of grain boundaries, 9
 irradiation, 278
high heat flux, 163
high-temperature brazing, 266
high-temperature superconductors, 57
hot isostatic pressing, 180
hybrid laser welding, 192
hydrogen, 106
 permeation, 63, 221
- I**
IFMIF, 228, 245
IFMIF/EVEDA, 1
 project, 46
Inconel 625 jacket, 187
insulator coating, 221
ion irradiation, 57
irradiation, 28
 hardening, 289
ITER, 70, 118, 171
- L**
linear accelerator, 252
liquid lithium, 46, 252
lithium
 loop, 46
 orthosilicate, 136
 target facility, 46

M

McCad, 228
McDeLicious, 228
mechanical property change, 289
metallic transmutation products, 272
methane, 214
MOCVD, 221
molecular dynamics, 91, 283, 289
simulation, 112, 235

N

Nb₃Sn, 208
neutron
irradiation, 83
multipliers, 157
source, 252
nondestructive evaluation, 77
nondestructive testing, 125

P

partial dislocations, 289
pebble bed, 136
pebbles, 157
PFC materials, 100

plasma-facing
component, 118, 163
material, 100, 125, 150
mockup, 142, 260
plasma irradiation, 171
plasma-wall interactions, 63
potassium-doped tungsten (W-K), 278
precipitate, 283

R

radioactive inventory, 245
RAFM steel, 192
reduced activation, 200
reduced activation ferritic steel alloy, 63

S

spark plasma sintering, 278
stacking fault energy, 289
structural integrity, 18

T

tensile performance, 187
test blanket module, 83, 180, 192

test cell, 245
thermal-structural analysis, 142
thermo-mechanical analysis, 83, 163
titanium interlayer, 266
tritium, 214
breeding materials, 83
release, 28
TRTM, 228
tungsten, 112, 150
armor, 272
joining, 266
twin grain boundary, 91
type 304 stainless steel, 77

V

vanadium, 106
verification, 208
void swelling, 77

W

W/Cu-divertor component, 125
welding, 131
