

## Technical Reviewers

### *Nuclear Science and Engineering, 2014*

The reviewers' identities are traditionally kept anonymous, yet their dedication to the arduous task of reviewing articles for *Nuclear Science and Engineering* is indispensable to the validation and dissemination of scientific information. In particular, their high professional standards are essential to enhancing the worldwide prestige and role of *NS&E* as the leading journal in the nuclear sciences and engineering. By listing in this issue the names of those who reviewed papers for *NS&E* during 2014, I am expressing both my personal gratitude and the appreciation of many of the authors for the reviewers' invaluable contributions and dedication.
