

Subject Index

Volume 193 · Numbers 1, 2, and 3
January, February, and March 2016

- AER-DYN-002, 175
AER-DYN-003, 175
Assessment, 47
Atucha-II licensing, 113
Automation, 200
- Best-estimate plus uncertainty analysis, 113
Boiling water reactor, 364
- Capsule, 330
Carbon steel, 306
Chemical durability, 297
Computational fluid dynamics, 234
 simulation, 375
Computer codes
 coupled codes, 15, 175, 183
 FLASH, 96
 MAAP5, 247
 MATRIX, 259
 MELCOR, 341
 MYRRHA, 36
 NE-COST, 219
 PARCS, 364
 PHISICS, 15, 175
 Pygmalion, 213
 R5EXEC, 183
 RAVEN, 161
 RELAP5, 47, 96
 RELAP5/MOD3.3, 364
 RELAP5-3D, 1, 15, 36, 88, 113, 161, 183, 200, 213
 coupling with PHISICS, 15, 175
 RGUI, 213
 STAR-CCM+, 375
 VEGAS, 416
 VISION, 416
Constrained material balance, 416
Control rod ejection, 175
Core
 blockage simulations, 88
 coolability, 88
 design, 234
Depressurization strategy, 247
Dynamic PRA, 161
- EBR-II, 1
Electromagnetic pump, 259
Emergency operating procedures, 247
- Final Safety Analysis Report, 113
Fuel cycles, 219
Fukushima Daiichi, 247, 318
Fuzzy Euler-Maruyama method, 444
- Gadolinium zirconate, 430
Glass fibrous insulation, 297
- Heat transfer characteristics, 375
High-temperature corrosion, 306
 inhibitor, 306
High-temperature gas-cooled reactor, 15, 234
Hilbert transform, 276
Hybrid methods, 391
Hydrogen peroxide, 434
- Irradiation, 330
- Lattice parameter, 287
Light water reactor, 375
Local Importance Function Transform (LIFT) method, 391
Localization, 276
Long-life core, 364
Loose parts, 276
Loss-of-coolant accident, 297
 alternative flow paths during, 88
- Model uncertainty treatment, 341
Molten salt reactor, 404
Multi-purpose hYbrid Research Reactor for High-tech Applications, 36
- Natural convection, 375
Neutron
 fluence, 330
 noise, 404
Nuclear economics, 219
Nuclear fuel cycle simulation, 416
- Point-kinetic component, 404
Point-kinetics neutron equation, 444
Porous region, 375
Precipitation, 318
Preconditioning, 416
Pump design, 259
- Qualification, 47
- Radioactive wastewater, 318
Radiolysis, 434
Regulation, 96
- Safety, 36
 margin, 161
Safety analysis evaluation methodology, 96, 200
Seawater, 434
Severe accident, 341
Shutdown Heat Removal Test, 1
Sintering
 method, high-temperature, 430
 parameters, 430
Small modular reactor, 364
Solid solution, 287
Solubility, 287
Stainless steel, 306
Station blackout, 161
- Triangular fuzzy number, 444
- Ultimate response guidelines, 247
Uncertainty analysis, 341
Variance reduction, 391
