

Subject Index

Volume 182 · Numbers 1, 2, 3, and 4
January, February, March, and April 2016

- 2-D geometry, 395
- 3-D reconstruction, 243
- Accident-tolerant fuel, 523
- Adjoint sensitivity analysis
 - methodology, 452
- Aerosol, 287
- APMT steel clad, 523
- Atmospheric nuclear detonation, 243

- Bayesian, 481
 - prognostics, 228
- Breed and burn, 197
- Burnup equations, 297

- Capture cross section, 377
- CASMO, 151
- CFD codes, 452
- Chebyshev rational approximation
 - method, 297
- Coarse mesh neutron transport, 369
- Collision probability, 395
- CONRAD, 377
- Containment subcompartment, 96
- Core design, 197
- Coupling, 119
- Critical flow model, 96
- Criticality
 - calculation, 555
 - excursion, 538
 - safety, 538
- Cross section, 563

- Depletion, 104
- Discrete ordinates, 166
 - method, 417
- Domain decomposition, 181

- Eigenvalue sensitivity coefficients, 332
- EOLE, 135
- ERANOS, 377
- Euler angles, 83
- Ex-core detectors, 213

- Fatigue crack precursors, 228
- Fissile materials, 481
- Fuel cycle transition analysis, 502

- Generalized perturbation theory, 354
- Global tally, 555
- Governing equations, 1

- Heavy water, 263
- Hyperbolicity, 54

- Incident flux response
 - expansion, 369

- LabVIEW, 119
- Laminar flow, 319
- Lattice physics, 151
- Linear source, 151

- Marginalization, 377
- Matrix exponential, 297
- Mesh free, 287
- Method of characteristics, 151
- MINERVE, 135
- Minimum required burnup, 197
- Monte Carlo, 181, 354, 555
 - direct simulation, 287
- Multilevel, 435

- Neutron, 563
 - correlation, 481
 - emission cross sections, 256
 - transport, 395
- New fields, 71
- Noninertial frame, 83

- Online monitoring, 228

- PHISICS, 104
- Power history, 263
- Predictor-corrector quasi-static
 - method, 435
- Printed circuit heat exchanger, 319

- PROFIL, 377
- PWR, 213

- Quadrature, 166

- Ray effects, 166, 417
- RELAP, 71
- RELAP5, 13, 119
- RELAP5-3D, 1, 83, 96, 104
- Response function, 369

- SCALE, 332
- SCCRED, 13
- Semicircular duct, 319
- Sensitivity coefficients, 354
- Source iteration
 - fission and surface, 181
- Stability, 54

- Target materials, 256
- Thorium, 263
- Transient, 435
- Transport benchmark problem, 452
- Transport equation, 417
- TRIPOLI-4, 135
- Tritons, 563
 - fully stopped beams, 256
- TSUNAMI, 332, 354
- Two-phase flow, 71

- Uncertainty
 - analysis, 369
 - decision making under, 502
 - evaluation, 13
- Uranium nitride, 523

- Verification, 1
- Vibrations
 - core barrel, 213
 - fuel assembly, 213
- Weak source, 538
