

Nuclear Science and Engineering

VOLUME 183 · NUMBER 1 · MAY 2016

Contents

TECHNICAL PAPERS

- 1 Second-Order Adjoint Sensitivity and Uncertainty Analysis of a Heat Transport Benchmark Problem—I: Analytical Results
Dan G. Cacuci
- 22 Second-Order Adjoint Sensitivity and Uncertainty Analysis of a Heat Transport Benchmark Problem—II: Computational Results Using G4M Reactor Thermal-Hydraulic Parameters
Dan G. Cacuci, Milica Ilic, Madalina C. Badea, Ruixian Fang
- 39 Discontinuity Factors for Simplified P3 Theory
Akio Yamamoto, Tatsuya Sakamoto, Tomohiro Endo
- 52 First Flight Escape Probability and Uncollided Flux of Nuclear Particles in Convex Bodies with Spherical Symmetry
P. Chiovaro, P. A. Di Maio, S. Garitta, E. Vallone, G. Vella
- 65 Improving the Accuracy of the Chebyshev Rational Approximation Method Using Substeps
Aarno Isotalo, Maria Pusa
- 78 Emulation-Based Calibration for Parameters in Parameterized Phonon Spectrum of ZrH_x in TRIGA Reactor Simulations
Weixiong Zheng, Ryan G. McClarren
- 96 Accuracy of Reactor Physics Parameters in Thorium-Loaded Accelerator-Driven System Experiments at Kyoto University Critical Assembly
Masao Yamanaka, Cheol Ho Pyeon, Takahiro Yagi, Tsuyoshi Misawa
- 107 Code Development and Target Station Design for Chinese Accelerator-Driven System Project
Han-Jie Cai, Fen Fu, Jian-Yang Li, Ya-Ling Zhang, Xun-Chao Zhang, Xue-Song Yan, Zhi-Lei Zhang, Jian-Ya Xv, Mei-Ling Qi, Lei Yang
- 116 Burst Wait-Times in the Caliban Reactor Using the Gamma Probability Distribution Function
M. M. R. Williams
- 126 Arbitrary Lagrangian Eulerian Formulation for Sloshing Tank Analysis in Nuclear Engineering
M. Souli, A. V. Kultsep, E. Al-Bahkali, C. C. Pain, M. Moatamedi
- 135 Photonuclear Benchmarks of C, Al, Cu, Ta, Pb, and U from the ENDF/B-VII Cross-Section Library ENDF7U Using MCNPX
Matthias Frankl, Rafael Macián-Juan

VOLUME 183 · NUMBER 1 · MAY 2016

TECHNICAL NOTES

- 143** Measuring the Neutron Signature of the $t \rightarrow d + n$ Triton Breakup Reaction and the Angle-Dependent Differential Cross Section of ${}^6\text{Li}(n,t){}^4\text{He}$ at 2.32 MeV
M. Drosg
- 149** Analysis of Multiple TRIGA-Based Molybdenum Production Reactor Cores Using a New Low-Enriched Uranium Target as Fuel
Andrew J. Hummel, Todd S. Palmer
